

About PAMI

PAMI is an ISO 9001:2015 registered applied research, development, and testing organization serving agriculture and industry in Western Canada and beyond.

PAMI's diversified engineering expertise has contributed to the growth of various industries but as of 2020 we are focused on supporting clients in agriculture, including value-added processing, mining and transportation

With over 40 years of experience designing, building, and testing equipment and processes, PAMI is well equipped to handle any problem.

Our team of researchers, engineers, technologists, agronomists, and fabricators are passionate about bringing your ideas to fruition.

Crop Processing Development Centre

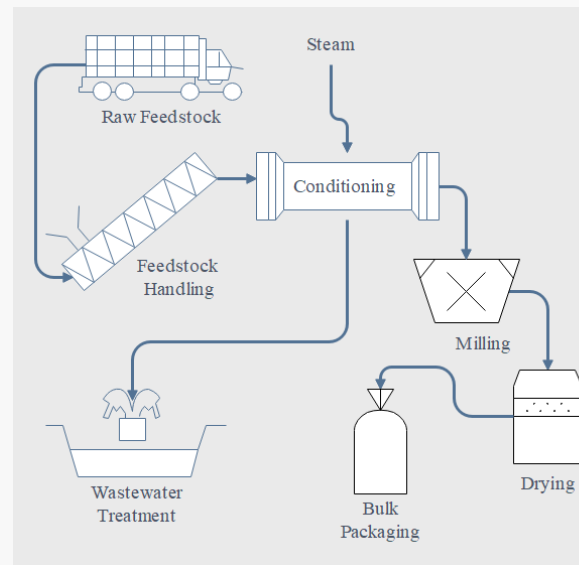

WE BRING YOUR
IDEAS TO
LIFE

- Includes high-capacity electrical and boiler capabilities
- Built to support primary processing of crops and by-products
- Flexible and configurable space for any custom processing line
- Integrated dust collection and waste (water and effluent) management

Our Capabilities

- Project management
- Process development & modelling
- Equipment investigation & sourcing
- Equipment testing
- Material handling
- Process scale-up & optimization
- Processing
- Labour & resourcing
- Engineering & shop support
- Detailed reporting
- Transportation & logistics
- Certification & documentation support

Why choose PAMI?

INTELLECTUAL PROPERTY

PAMI never owns Intellectual Property – it always belongs to the client.

COMMERCIALIZATION

PAMI does not commercialize. We support clients on their journey to commercialization.

CONFIDENTIALITY

As an external supplier, PAMI recognizes the importance of client confidentiality, maintains strict confidentiality guidelines and has developed a sophisticated three-level confidentiality program. Clients may choose the level that best suits their needs and comfort level.

FUNDING OPPORTUNITIES

PAMI has several agreements and connections with funding sources that can be applied to value-added processing projects.

ONE-STOP SHOP (RDBTC)

We have cutting edge facilities, tools, and equipment to Research-Design-Build-Test-Commission. Our talented employees work shoulder to shoulder with you to bring your vision to reality – from start to finish.
